

AI USAGE DISCLOSURE FORM

1. Team Details

Team Name: Binary Bits

Project / Product Name: Streaming Live RAG

Organization / Institution: SRM Institute of Science and Technology

Submission Date: 30/09/2026

2. AI Usage Declaration

Did your team use AI in developing this project? Yes.

3. Purpose of AI Usage

Idea generation / brainstorming: Claude assisted with reading and summarizing papers related to SemEval-2026 Task 8, "MTRAGEval: Evaluating Multi-Turn RAG Conversations." This task addresses conversational retrieval and grounding; our project additionally handles streaming transcript chunks. Task reference: <https://aclanthology.org/2026.semeval-1.447/>

Code generation or assistance: OpenAI ChatGPT/Codex assisted with pipeline implementation, dashboard integration, evaluation scripts and Docker packaging.

UI / UX design: Muse Spark suggested a dashboard implementation plan. ChatGPT/Codex assisted with implementing and refining the interface.

Content creation: ChatGPT assisted with documentation, presentation text, Mermaid diagrams and demo narration.

Data analysis: Codex assisted with benchmark analysis; Cerebras GPT-OSS-120B supplied model-based grounding judgments.

Testing / debugging: Codex assisted with writing tests, running approved checks and investigating failures.

Other: Cerebras GPT-OSS-120B is conditionally called by the application for compound-query decomposition and evidence-span selection.

4. Feature Origin Classification

Feature Name: Streaming and Hybrid Retrieval

Classification: Both

Description: Codex assisted with timestamped transcript handling, retrieval control, BGE-small/LanceDB dense retrieval, BM25, RRF fusion and cross-encoder integration.

Prompt purpose: retrieve from stable partials while preserving revisions. The team reviewed behavior and implementation changes.

Feature Name: Multi-Intent Handling and Grounding

Classification: Both

Description: Codex assisted with routing and validation code. Cerebras GPT-OSS-120B decomposes eligible compound requests and selects evidence spans. Prompt purpose: preserve independent intents and use retrieved evidence only. Outputs are checked against source text and passage IDs; the team reviewed evaluation candidates.

Feature Name: Dashboard and Follow-Up Interaction

Classification: Both

Description: Muse Spark suggested the dashboard plan; Codex assisted with implementation. Prompt purpose: expose streaming chunks, decisions, evidence and actual LLM calls. The team directed scenario selection and requested interface and behavior corrections.

Feature Name: Evaluation and Deployment

Classification: Both

Description: Codex assisted with tests, architectural ablations, trace validation and Docker setup. Cerebras supplied semantic evaluation judgments. Prompt purpose: verify deliverables and report measured results honestly. The team approved runs, reviewed findings and retained responsibility for submission claims.

5. Ethical & Compliance Confirmation

AI usage complies with guidelines and policies: Yes, subject to applicable competition rules and service terms.

No proprietary or copyrighted data misused: I Agree, subject to confirmation that dataset, model and library licenses have been followed. AI-assisted outputs were reviewed and revised. The team remains responsible for implementation decisions, verification and final claims. Credentials are not included in submitted source code.

6. Declaration & Sign-Off

Name of Team Representative: Aakarsh Kumar

Role: Team Leader

Signature: 

Date: 30/09/2026
